## LIST OF PUBLICATIONS (most recent first) [Last updated: 2024, July 31]

- Sparsity dependence of Krylov state complexity in the SYK model [1]
- Thermal state preparation of the SYK model using a variational quantum algorithm [2]
- $\bullet$  SU(2) principal chiral model with tensor renormalization group on a cubic lattice [3]
- Phase diagram of generalized XY model using tensor renormalization group [4]
- Hamiltonian simulation of minimal holographic sparsified SYK model [5]
- Tensor renormalization group study of 3D principal chiral model [6]
- Phase diagram of two-dimensional SU(N) super-Yang-Mills theory with four supercharges [7]
- A model of quantum gravity on a noisy quantum computer [8]
- Continuous variable quantum computation of the O(3) model in 1+1 dimensions [9]
- Toward quantum computations of the O(3) model using qumodes [10]
- GPU-Acceleration of Tensor Renormalization with PyTorch using CUDA [11]
- Supersymmetric Wilson loops on the lattice in the large N limit [12]
- Notes on Quantum Computation and Information [13]
- Non-perturbative phase structure of the bosonic BMN matrix model [14]
- Thermal phase structure of dimensionally reduced super-Yang-Mills [15]
- Tensor renormalization of three-dimensional Potts model [16]
- Introduction to Monte Carlo for Matrix Models [17]
- Large-N limit of two-dimensional Yang-Mills theory with four supercharges [18]
- Tensor renormalization group study of the three-dimensional O(2) model [19]
- Three-dimensional super-Yang-Mills theory on the lattice and dual black branes [20]
- Positive Geometries for all Scalar Theories from Twisted Intersection Theory [21]
- Critical analysis of two-dimensional classical XY model [22]
- Finite N unitary matrix model [23]
- Thermal phase structure of a supersymmetric matrix model [24]
- Tensor renormalization group study of the non-Abelian Higgs model in two dimensions [25]
- Lattice quantum gravity with scalar fields [26]
- The properties of D1-branes from lattice super Yang-Mills theory using gauge/gravity duality [27]
- Removal of the trace mode in lattice N=4 super Yang-Mills theory [28]
- Truncation of lattice N = 4 super Yang-Mills [29]
- Nonperturbative study of dynamical SUSY breaking in  $\mathcal{N}=(2,2)$  Yang-Mills theory [30]
- Testing the holographic principle using lattice simulations [31]

• Testing holography using lattice super-Yang-Mills theory on a 2-torus [32]

## **Bibliography**
